

Environment Policy

Galilee Energy conducts our operations in a manner consistent with sustainable development principles to reduce the impact of our activities on the environment.

To deliver on our commitment to sustainable development, Galilee Energy:

- Maintains a Health Safety and Environmental Management System to track, monitor and measure our environmental performance and record and share lessons learned
- Complies with or exceeds environmental laws and statutory obligations in the countries within which we operate, along with relevant voluntary codes of practice
- Ensures that the appropriate resources and training are provided for employees to enable them to achieve our environmental commitments
- Manages resources with the aim of reducing pollution and waste, using water and energy efficiently, and addressing biodiversity needs relevant to our operations
- Proactively identifies environmental hazards, assesses their risk and manages the risk to as low as reasonably practicable
- Ensures that incidents, near misses, concerns and complaints are reported, investigated and corrective actions implemented
- Sets and monitors measurable targets for continual improvement to our environmental performance.
